Mode Selector Switch

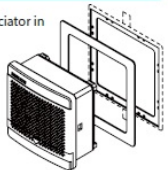

Up to 95dB (at 1m)
Despite its slim appearance, it is able to produce a maximum of 87dB (at 1m).
(Actual sound level will depend on sound type and surrounding operating conditions.)

Volume Control
The volume is easily accessible from the front for adjustment.

Memory Card Slot
With an SD Card, messages can be changed while the unit is still mounted.

Optional Bracket (BK-001)
This bracket is used to install the annunciator in a place where holes have already been drilled for conventional PATLITE products.
(φ133mm Type)

Série - MS - BSV - montagem

Actual Size
19,9mm

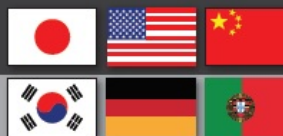

Panel Mount

Wall Mount

Use it for multilingual messages

- Scene: Stores, Hotels, public transportation, tourist resort spots
- Application: Announce Events, Emergency Service, Museums, etc.

With a four-language playback, it gives 4 times as many messages.

The support for multilingual communication is increasing due to the improvement in service at commercial establishments, such as for transportation, tourist resort, etc. and the audio assistance has been increased by more languages, such as Japanese, English, Chinese and Korean; therefore about 4 times the amount of playback time is needed. With the BSV-L model, a maximum of 520 seconds in playback is easy to support several multilingual messages.
